SUMMARY

Computer Science undergraduate at SRM Delhi-NCR with hands-on experience in full-stack web development, DevOps, and production game-server infrastructure. Build full-stack applications with React, Node.js, and MySQL deployed on Linux VPS behind Nginx and PM2. Operate a production Minecraft network on Debian using Pterodactyl + Wings with a load-balanced proxy fleet and Cloudflare Spectrum DDoS mitigation, sustaining 1000+ concurrent player peaks. Active in-game server admin and Java plugin developer at Battle Pie.

EDUCATION

- **SRM Institute of Science and Technology** Delhi-NCR, IN
B.Tech in Computer Science Engineering; **CGPA: 8.63** Aug 2024 – Jul 2028
- **The Adhyayan School** IN
Senior Secondary (CBSE), PCM: 67% Aug 2022 – Jul 2024

EXPERIENCE

- **Battle Pie – Self-Operated Minecraft Network** IN
Server Admin, Plugin Developer & Infrastructure Operator 2023 – Present
 - Operate production Minecraft network with **1000+ concurrent player peaks** across a dedicated bare-metal **Debian** host fleet.
 - Orchestrate containerized game-server instances via **Pterodactyl panel with the Wings daemon**; provision lobby and gamemode servers across the host pool.
 - Front the network with a **load-balanced proxy fleet** that fans connections out to backend servers; **Cloudflare Spectrum** for L4 DDoS mitigation and SSL.
 - Develop custom **Java plugins** for backend gameplay; serve as in-game admin handling moderation, gameplay tuning, and live ops; operate the customer-facing store at store.battlepie.net.

PROJECTS

- **BSingh's Vault – Full-Stack Bank Management System** 2025
dbms.bsingh.codes | GitHub
 - Took DBMS course project from broken state to production-grade deployment: authentication with freeze enforcement, full transaction history, and admin panel.
 - Built with **React, Node.js, Express, MySQL**; deployed on Linux VPS behind Nginx with PM2 process supervision; sustains 99.9% production uptime.
- **AyuTrace – Blockchain Herb Traceability** (Team Contributor) 2025
ethicons.vercel.app | GitHub
 - Contributed to **Solidity** smart contracts on EVM for tamper-proof Ayurvedic herb supply-chain tracking.
 - Implemented geo-tagged origin records, immutable quality certifications, and consumer-facing QR codes for full farm-to-formulation history.
 - Stack: **Next.js, Solidity, ethers.js, MongoDB**.
- **FNDP – AI-Powered Fake News Detector** (Team Contributor) 2025
fndp-frontend.vercel.app | GitHub
 - Contributed to ML-based misinformation detection using a **Python** classification model that identifies fake headlines and articles.
 - Built **React** frontend deployed on Vercel that interfaces with the detection backend.

ACHIEVEMENTS

- **Smart India Hackathon 2025**: Cleared Internal SIH 2025 with team Ethicons (AyuTrace – blockchain herb traceability).
- **Hackstasy Hackathon**: Top 20 teams of 300+ participants for a scalable full-stack project.
- **1st Prize – College Science Project Expo**, SRM Institute of Science and Technology, Delhi-NCR.

TECHNICAL SKILLS

- **Languages**: C, C++, Python, Java, JavaScript, TypeScript, SQL
- **Frameworks & Databases**: React, Next.js, Node.js, Express, Tailwind CSS, MySQL, MongoDB
- **Infrastructure & DevOps**: Debian, Pterodactyl + Wings, Nginx, PM2, Cloudflare, SSL/TLS, DDoS Mitigation, GitHub Actions, Git, Vercel
