SUMMARY

Computer Science undergraduate at SRM Delhi-NCR with hands-on experience in full-stack web development, DevOps, and production infrastructure. Built and deployed end-to-end applications using React, Node.js, and MySQL on Linux VPS with Nginx and PM2 process supervision. Operates production game-server infrastructure serving 1000+ concurrent players with Cloudflare Spectrum DDoS protection and SSL/TLS. Strong in scalable application design, deployment automation, and full software lifecycle.

EDUCATION

- SRM Institute of Science and Technology** Delhi-NCR, IN
B.Tech in Computer Science Engineering; **CGPA: 8.63** Aug 2024 – Jul 2028
- The Adhyayan School** IN
Senior Secondary (CBSE), PCM: 67% Aug 2022 – Jul 2024

EXPERIENCE

- Battle Pie – Self-Operated Minecraft Network** IN
Network Operator & Infrastructure Engineer 2023 – Present
 - Operate multi-region Minecraft server network with **1000+ concurrent player peaks**; multi-host architecture across dedicated bare-metal infrastructure.
 - Configured and maintain **Cloudflare Spectrum** DDoS mitigation, SSL/TLS termination, and Nginx reverse proxy across the network.
 - Deploy and supervise game-server processes via **PM2 on Linux VPS**, sustaining 99.9% production uptime.
 - Maintain a custom Java plugin stack and integrated customer-facing store at battlepie.net.

PROJECTS

- BSingh's Vault – Full-Stack Bank Management System** 2025
dbms.bsingh.codes | GitHub
 - Took DBMS course project from broken state to production-grade deployment: authentication with freeze enforcement, full transaction history, and admin panel.
 - Built with **React, Node.js, Express, MySQL**; deployed on Linux VPS behind Nginx with PM2 process supervision; sustains 99.9% production uptime.
- AyuTrace – Blockchain Herb Traceability** (Team Contributor) 2025
ethicons.vercel.app | GitHub
 - Contributed to **Solidity** smart contracts on EVM for tamper-proof Ayurvedic herb supply-chain tracking.
 - Implemented geo-tagged origin records, immutable quality certifications, and consumer-facing QR codes for full farm-to-formulation history.
 - Stack: **Next.js, Solidity, ethers.js, MongoDB**.
- FNDP – AI-Powered Fake News Detector** (Team Contributor) 2025
fndp-frontend.vercel.app | GitHub
 - Contributed to ML-based misinformation detection using a **Python** classification model that identifies fake headlines and articles.
 - Built **React** frontend deployed on Vercel that interfaces with the detection backend.

ACHIEVEMENTS

- 1st Prize – College Science Project Expo**, SRM Institute of Science and Technology, Delhi-NCR.
- Hackathon Participations**: Multiple inter-college and online hackathons including team builds with Ethicons (AyuTrace blockchain traceability).
- Production Game-Server Operations**: Sustained 1000+ concurrent peak with Cloudflare Spectrum DDoS mitigation across multi-host architecture.

TECHNICAL SKILLS

- Languages**: C, C++, Python, Java, JavaScript, TypeScript, SQL
- Frameworks & Databases**: React, Next.js, Node.js, Express, Tailwind CSS, MySQL, MongoDB
- Infrastructure, DevOps & Concepts**: Linux Server Administration, Nginx, PM2, Cloudflare, SSL/TLS, DDoS Mitigation, GitHub Actions (CI/CD), Git, Vercel, REST APIs, Full-Stack Development, DBMS, OOP, DSA, Web Security
